

16 November 1960

MEMORANDUM TO: The Inspector General

SUBJECT: Speech scheduled by the IG for San Francisco, 18 November 1960.

1. The State Department has no objection to this speech provided the following changes are made:

P. 3, line 7: Re the population gain of "120%" from 90 million to "200 million," State says that "our figure is 180 million."

P. 4, lines 9-10: State questions "literally thousands" of Communist representatives "swarming over the Continent."

P. 4, lines 9-10: State questions "three" countries with Communist representation: "If all ELAC missions are intended, there were more than '3' two years ago (now 4). If only USSR missions are intended, only one (Cuba) has been added."

P. 17, first sentence, lines 1-6: State questions sentence construction, suggests adding ",and" after "participated as a delegate. . ." in line 4.

2. This office concurs with State that these changes are necessary.

3. The only other comment we have is the opinion that International Communism is of less interest to Latin Americans than domestic Communist disturbances that might immediately affect their Governments. The Latin American Press will pay little attention to this speech.

4. The lateness of receiving this speech resulted in the usual request by State that we get copy to them in such time that they do not have to drop other work to clear late copy by CIA.

5. Request the attached text be returned to this office after examination by the IG, for our files.

Stanley J. Grogan
Assistant to the Director

Attach.
